course to save the sectors from the droid invasion. Meanwhile his ambassadors Bethany and Trembley are negotiating a possible alliance which more by accident indeed comes to terms that might tip the scales if the big battle for Elysium. Previously we have a quite charming encounter between the USA droids and Moonlight Spalding. I do love this character, I really do. And finally his errant son realizes that those stories were not made up, but very real indeed. The Admiral's comments on the things happening and himself are entertaining as always and Akantha is her charming, bloodthirsty self. Most of the book is about the big battle for Elysium, which is well written and has a lot of action happening. As most series the book makes most sense as part of the other books, this is an ongoing story about what happens with the main characters after all. However, to keep things interesting and the main characters true and likeable, that is the art to writing a series. And congrats on the idea with the title and the last sentence! 0 von 0 Kunden fanden die folgende Rezension hilfreich. was nice Von FoxFiregood book read again look forward to more you should too. Dragged on in some areas but not in tigers

Kurzbeschreibung Book Seven of Eight in the Spineward Sectors Series: Admiral Invincible Another day, another set of problems for the Spineward Sectors youngest Admiral. Fresh off the battle of Aqua Nova, Admiral Montagne Co. find themselves navigating uncharted waters, surrounded by allies who seemingly have little interest in the Multi-Sector Patrol Fleet or the safety of its people. Determined to avoid having his people used as human shields in the fast-approaching final conflict with the Droid Tribes, the Little Admiral will have to dig deep into his bag of tricks to have even a prayer of coming out ahead when the final tally is made. But with a parricidal cousin and mutinous former First Officer off negotiating an unthinkable truce on his behalf; an increasingly depressed and bitter Chief Engineer grappling with his place in the universe; a wife who seems to think this is the ideal time for a momentous, life-changing event to take place; and a ramshackle fleet with far less throw weight than he would have liked to take into battle one that's manned by a severely undertrained crew what could possibly go wrong? It's all just another day at the office for the intrepid crew of the MSP.
