Clever novel fusing mystery and science fiction.Von Ein KundeCYBER WAY is one of those rare science-fiction novels that, while not being a pathbreaking contribution to the genre, well repays rereading.It fuses the kind of mystery pioneered by Tony Hillerman (in which Navaho culture is central to the plot and most of the cast is Navaho) with cutting-edge

science fiction dealing with cyberspace. The MacGuffin that drives the plot is not merely a throwaway -- instead, it is central to the action and plausibly, chillingly developed. There are a few holes -- at first, the Navaho detective treats his out-of-town white-bread Floridian colleague with surface good humor and respect but with an undercurrent of impatience and condescension that is never really explained -- but you forget about them after a while. I wish that Alan Dean Foster would write another novel or two about Paul Ooljee and Vernon Moody.

Von Ein Kunde

Accidentally picked up this stinker at the airport, rushing to catch a flight. oh my god. prose that whines, bores and tires. granted there is a cute idea wrapped in all the tedium, perhaps enough for a short story or a novella, not a book. truly `a dark and stormy night' quality of writing: ``As Moody's gaze rose from the screen he noted that the wind was no longer blowing across the canyon. Instead it was now blasting toward them, making his own hair and (much more impressively) that of Samantha Grayhills' stream out behind their heads." the author attempts to add character development to the story, instead paints caricatures. bored and desperate to kill time i found myself skipping pages at a time to make the pace passable, to get to the end so i could throw this thing out. double ick.

A fascinating book combining the traditions of the Navaho indian tribes and post modern culture and technology, while at the same time a thought-provoking "how done-it" . The story revolves around the investigations of a Miami detective looking into the bizarre murder of a wealthy business man and its relation to a unique Native American sandpainting. His investigations take him to California where he calls upon the assistance of a local Navaho detective. While there he uncovers links to an ancient alien race, and is called upon to eliminate a possible threat to all mankind

Kurzbeschreibung Homicide - or cosmic catastrophe? Detective Vernon Moody is a modern cop who likes to catch killers the modern way - with computer webs, databases and common sense. So he's not happy when his latest case revolves around the supposedly mystical properties of a lost Navaho sandpainting. Or when the painting leads him to suspect an alien presence in his modern world. No Moody's getting scared and what started out as a routine murder investigation may uncover the very nature of reality - or destroy it forever!
