old philosophical perception of dark and light. for all who are able to open their minds and can immerse in an alternate reality a definite must read.

Kurzbeschreibung"I cannot recall a time when the sacred flames of The Nether did not call to me. Even now, sent to this insane plane of existence, surrounded by those that have forgotten their past, I still find myself entranced within the flickering dance of my favorite Element. Humanity has no idea why they have been birthed in this plane and truth, I don't know if it would make a difference if I told them. For those of Free Will believe what they wish, no matter the consequences, be they death, dishonor or sheer madness. Now, I roam this plane called Sol'volo, searching for that which was stolen, to halt the un-making of all Creation and right a wrong. My constant-and Light-lapping-companion is a Prince of The Trinity's armies, feared throughout the realms for his flaming blade and broken virtue. A blade that can tear the fabric of time and space itself...and leave me wanting to gack in the process. Some believe that I am the darkest evil to ever exist within this plane, while others know that the very salvation of all Creation rests on my bone-pale shoulders. Mortal minions, insane squirrel jockeys and a body count that keeps climbing. Naghi. This should get interesting..." Step into the world of Maeve Bandruid's 3rd book. From Demons and Angels to Aliens and Devas, Cynarra's tale will have you questioning everything you've been taught was Truth as the very fabric of Time and History are twisted in her quest for books that could un-make all Creation. Leave your preconceived notions of Good and Evil at the door, place a blessed blade beside your bed, and don't turn your back on that owl in the window...Kurzbeschreibung"I cannot recall a time when the sacred flames of The Nether did not call to me.
