where were we again timewise? Von Rin Hayashi The author did it! In three volumes from about 1980s to about 2030s!! But, we do not get any sci-fi. We get our "today"-romance. So nothing to worry. The world will not progress much. We'll stay the same technologywise for a long, long time. In this issue we meet Aidan again. He claims he hasn't seen any of his kind in a long while. Because 50 years is long now when a century is considered short... um... yeah. His mate is a woman mostly turned by a vampire which is nice as this is a new turn. But that's it. That's about all that's new. So enjoy the third installment of the series!

Von Sarah Dark Gold is a good book, and stands fairly well on its own (it is the third in a series), but does not quite reach up to the standards of the earlier books. Aidan is a carbon copy of Mikhail and Jacques in the previous books. I suppose all "Carpathian" males exhibit the same qualities and that is what makes them who they are (protective, arrogant, self assured, devoted and strong willed) but reading the same story for the third time can be a bit awkward. They are all good stories, but how many times can one read about a dominant male and his independent life-mate/wife? I found Alexandria to be the most believable of the female leads. She resists the changes happening to her, not knowing how to handle everything. Her first encounter with a vampire is a traumatic one and she doesn't understand (or want to understand), the differences between a vampire and a Carpathian. Aidan tries his best to protect her, though I found that he did very little to explain her new powers (telepathic communication, shape shifting, etc...). Aidan lets her have her space to try and find her new self, (though he is never too far behind) and I found that to be a refreshing change. One of my biggest disappointments in the story is the lack of interaction with the previous characters. We see Gregory (and have throughout the books) and I have to assume that the next story will be his. But we do not see anyone else, not even Aidan's brother. Since the Carpathians are to some extent telepathically connected, I would have thought Mikhail would have at least shown himself to welcome the newest female to the clan. I would have also liked to have heard some news about Jacques and Shea (since at least 18 years have past since the last book). Well maybe I'm getting too nit-picky. I did enjoy the book, and suggest reading it, though I suggest picking up Dark Prince and Dark Desire first.

Must Read 'Keeper' Series Von Shawna Lanne Dark Gold is about Aiden Savage the latest Carpathinian to be saved from becoming a vampire by his psychic soul mate. It is the third book in a series that I hope continues indefinitely about a dying race, the Carpathinians. After being alive a couple a hundred years they lose the ability to feel, and to be decent beings without the love of a good woman. Unfortunately, women are not being born to Carpathinians and generally humans can not give birth to Carpathinians. Except it seems a woman with psychic abilities. When a Carpathinian male has lost his ability to feel, and his hope of finding a mate he turns and becomes a vampire. Even though Dark Gold builds on the two preceding books in the series it stands alone as a great fantasy romance with a compelling hero, a likeable if not too bright heroine and great supporting characters. If you like vampire books this book and the series is a must read.

Kurzbeschreibung Alexandria Houton will sacrifice anything to protect her little brother. But when they both encounter an unspeakable evil in the swirling San Francisco mists, Alex can only pray for their deliverance... And out of the darkness swoops Aidan Savage, a being more powerful and more mysterious than any other creature of the night. This ageless Carpathian male has saved them both from a hideous fate. But is Aidan truly Alexandria's salvation... or her ultimate betrayer? And if she surrenders to Aidan's savage, unearthly seduction is Alexandria in danger of sacrificing more than her life?
