KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. A musician's loveVon QuerleserThe music scenes, the descriptions of the songs, the instruments, the music sessions - they all are wonderful.The two MCs though are barely toerable, they don't have any chemistry at all, so why they claim to love each other is beyond me.Should have been a story about music and friendship, not love.So it's a nice

story with wonderful music and the love story ... well, ignore it!

Kurzbeschreibung Gary Winston is a professional musician with a debilitating problem: stage fright. Between his failing career and his failing relationship, Chicago has little left to offer him, so when he inherits his great-aunt's pecan farm in North Carolina, it's the perfect excuse to escape. Nervous about being back in the deep South again, surrounded by small-town homophobia, Gary's certainly not ready to fall in love. Then he meets local farmer, businessman, and fiddle player Chuck Everett, whose family has been contracted to harvest the crop of pecans. Chucks the perfect man for Gary... except for being deep in the Southern closet. Life heats up quickly when they start making music together, and though both men have more than their fair share of baggage, neither can walk away from the relationship. If Gary rediscovers his muse and realizes being true to himself means moving past his comfort zone, will going forward mean leaving Chuck behind?
