Can't wait for the next book. Richard Philips created a quite unique story line for the Rho Agenda books. And Jack is one of the most interesting characters I have seen in a very long time. Intriguing idea to mix science fiction with special forces action, these books are hard to put

down. The AI we meet in this story is a next step in development well thought over. Advanced like this it supposedly will only appear for real in another 50 or 100 years, but who knows, it might be sooner. However, you cannot help to be fascinated by it. In some way, we see the hackers dream come true: not just hack the system from the outside, but become part of it by becoming the AI itself. Manipulating by thought, not keyboard. Scary, but fascinating none the less. What will be the most interesting to see in the coming books is how the author will bring all these story lines together. As I said before, Can't wait! 0 von 0 Kunden fanden die folgende Rezension hilfreich. ActionVon NiceCatThere is something which develops through all three books. Each book has its own story, but you really should read them in order. The stories in the books are really different, not as in many series, where each book is the same again. (Which sometimes is what you like) The protagonist(s) is (are) working for the NSA (USA), at least... kind of. The main story in each book is always towards something big and interesting. There is a lot of action. And the action is good to read. The rest is good to read too. This is not a "have to" read, but I read all three books in one go. 0 von 1 Kunden fanden die folgende Rezension hilfreich. ChrisVon Hans Christian OeljeschlaegerWeakest of the three books, somehow the link between yesterday, today and tomorrow not convincing. Outcome of too many encounters between agents and criminals predictable.
