Now I am really curious what that blasted Sun staff can do and have to wait till the next book. And this is not a spoiler since that story line is already mentioned in the ads for the third book. So, to this book I would like to say that is has a very interesting story and of course we would like to know how Jack and Janets

tale went before the two ships appeared in the later time. I liked this book better than the first because of the mystery around the Incan Sun staff which for me at least, much more interesting than the Baikonur plot. However our two main protagonists are as close to unbeatable as you can get which is very entertaining if you like such stories, which I do. The storyline at NSA headquarters with all that computer stuff is very well developed, too. 0 von 0 Kunden fanden die folgende Rezension hilfreich. ActionVon NiceCatThere is something which develops through all three books. Each book has its own story, but you really should read them in order. The stories in the books are really different, not as in many series, where each book is the same again. (Which sometimes is what you like) The protagonist(s) is (are) working for the NSA (USA), at least... kind of. The main story in each book is always towards something big and interesting. There is a lot of action. And the action is good to read. The rest is good to read too. This is not a "have to" read, but I read all three books in one go.

From bestselling author Richard Phillips comes a globe-spanning sci-fi thriller series with a twist...culminating in the cataclysmic events that set the stage for the Rho Agenda.
