newest Blaze tale - Wicked. I say it in plural because "Tori" is actually Lori and Tony Karayianni, a wife and husband writing team that is nothing short of brilliant. Their newest book is simply a "wicked" delight! The Batman and Robin, um...so to speak...of Romance, this savvy writing duo has the pulse on what makes a story tick. They create very down to earth characters, someone you might know, put them in very real situations - and then turn up the heat! Wicked is "Tori" at their best! It just does not get any better than this! They take their engaging characters, add a liberal dose of titillating, devilish humour that will have you laughing out loud, marvelling at their sassy style. Blaze is known for "Red-hot reads" and this is prime example of the series. In Wicked, Renae Truesdale lives in an apartment above sexy British doctor, Will Sexton. For months, they have been winking and flirting from a distance. Renae is not looking for a man in her life at the moment, instead trying to concentrate on her career. Down the road, she dreams of affording a home of her own. She especially isn't looking to become involved with Will. He's been seriously dating a resident at the hospital where he works. Will is hoping the romance will lead to love, however, the target of his affections has inconveniently become a "born-again virgin". This has lead Will to indulge in hot fantasies about the sexy Renae upstairs. He has a mistaken impression about her, causing him to keep his distance. But when she coming down stairs in a belly dancing costume, all his stiff upper lip Brit intentions fly out the door. They both decide for different reasons to avoid each other after a sizzling kiss, only good intentions come to nothing when fate steps in, pushing them in each other's path. There is only so much two very healthy adults can stand, so they, against better judgement, jump into an affair, both telling themselves it's just for the physical side of the relationship. Even so, Will and Renae quickly find themselves head over heels, out of control and in love. The Carrington team sizzles. They are dazzling writers with vivid imagery, characters that make you care. Their delightful love of life shines through their humour, showing they can do more in 250 pages than any writer around. I have enjoyed - really enjoyed - all the Carrington books, but this one is sheer perfection on wheels! You won't want to miss the story that comes before this - Indecent. I bought them at the same time and read this one first, drawn by the Brit hero. I should have stopped when I realised Indecent came first, and switched to it, but by the time I understood Wicked came second, it was too late. I could not put this one down.

Kurzbeschreibung Will Sexton can't wait to run into his knockout neighbor every day as she leaves for work in her sexy dance costume. But what he'd really like is a chance to see, firsthand, what's underneath the soft material. Only, he has every reason to believe that he's not exactly Renae's type. Unfortunately, that idea only adds to the X-rated fantasies he has about her night after night. For months Renae has been craving a wild session in the sack with the hot guy who lives downstairs. So when they get together again and again, she thinks she's getting exactly what she needs. Insane, illicit, incredible sex no strings attached. But she soon realizes she doesn't want to be just the woman Will has forbidden sex with. She wants to be the woman he'll never, ever forget.
