short story collections is that they give you a taste of so many different writing styles as well as a wide variety of settings and topics. This book features stories from brilliant Black Lace authors like Portia Da Costa, Tabitha Flyte, Astrid Fox, and Alison Tyler; but also includes great new writers. You'll find a few wonderful stories to return to again. Among my favorites are "Scratch", the story of an English monk and a Viking priestess in a historical setting, "Screen Dream" about a Domina, "The Mayfair", a comedy with Jewish American humor, and "Melinda" who discovers a liking for bondage. These stories were just great! However, some of the other stories I didn't even want to finish reading. On the whole a good collection, but I'd rather read a Black Lace novel than another anthology.

Kurzbeschreibung Delicious sex and arousing action abound Wicked Words 4. Hugely popular, the series is a showcase of writing by women at the cutting edge of erotic fiction, pushing the boundaries of unashamed, explicit indulgence. Full of action and attitude, humour and hedonism, this anthology is imaginative and wildly entertaining, making Wicked Words collections the juiciest erotic stories to be found anywhere in the world. Pressestimmen "Steamy" (New Woman) "Really does live up to the billing as "wicked"." (Forum) Werbetext Black Lace - the leading erotic imprint for women
